Non-GAAP Financial Measures

This presentation contains non-GAAP financial measures, including adjusted EBITDA, adjusted operating income, adjusted diluted EPS, and free cash flow. Reconciliations of non-GAAP measures to the most directly comparable GAAP measures are included in the appendix to this presentation.

Comparability of Results

All figures in this presentation are prepared under U.S. GAAP, unless noted otherwise.

As a result of the combination of GTECH S.p.A. (“GTECH”) and International Game Technology (“legacy IGT”), which was completed on April 7, 2015, a number of items affect the comparability of reported results. Reported financial information for the full year 2016 includes the results of operations of IGT PLC for the entire period, while reported financial information for the full year 2015 period includes IGT PLC for the second, third, and fourth quarters and only GTECH operations in the first quarter. Pro forma figures represent the combined results of both companies.

Adjusted figures exclude the impact of purchase price amortization, impairment charges, restructuring expense, and certain one-time, primarily transaction-related items. Reconciliations to the most directly comparable GAAP measures are included in the appendix to this presentation.

Reported 2016 results were impacted by the strengthening of the U.S. dollar compared to the euro; the daily average Euro to U.S. dollar foreign exchange rate was 1.08 in the fourth quarter of 2016 compared to 1.10 in the fourth quarter of 2015, and was 1.11 for the full year 2016 period compared to 1.11 in 2015. Constant currency changes for 2016 are calculated using the same foreign exchange rates as the corresponding 2015 period.

Management believes that referring to certain pro forma, constant currency, or adjusted measures is a more useful way to evaluate the Company’s underlying performance.
