Aviv Sher, CEO of Codere Online, stated, “In Q4 2023 we delivered an impressive 33% growth in net gaming revenue to €50 million, our highest ever quarterly figure, despite a tough comp with the World Cup in the prior year period. Our strategic focus on Mexico and Spain, where we are seeing a strong return on marketing investment, has proven successful, with significant increases in both our active customer base and spend per customer. Casino continued to exceed our expectations with a second consecutive quarter contributing 58% of total net gaming revenue in the period.”

Mr. Sher further added, “Our net gaming revenue in Mexico grew by 54% in the fourth quarter, reaching more than €25 million, whereas net gaming revenue in Spain, grew by 17%, to nearly €21 million. We were able to grow our active customer base by more than 15% in both markets in the quarter which we believe is impressive considering the similar level of marketing investment in these countries in 2023 versus the prior year.”

Oscar Iglesias, CFO of Codere Online, stated, “Our fourth quarter results have allowed us to reach nearly €172 million of net gaming revenue for the full year, 19% above the midpoint of the initial €140-150 mm outlook we provided early last year. This outperformance, combined with the overall lower level of marketing investment, also allowed us to deliver a better than expected negative €12mm in Adjusted EBITDA versus the initial outlook of negative €20-30mm.”

Mr. Iglesias further added, “We are very encouraged by our performance in 2023 which further supports our expectation that we will generate positive Adjusted EBITDA and cash flow for the full year in 2024, a year in which we expect net gaming revenue of €185-200 mm. In short, we expect to deliver upon our original commitment to investors to be a profitable company in the third year after de-SPAC and are more committed than ever to creating meaningful value for our shareholders.”

Financial Information and Non-GAAP Financial Measures

Codere Online's financial statements are prepared in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board ("IFRS"), which can differ in certain significant respects from generally accepted accounting principles in the United States of America ("U.S. GAAP").

This document includes certain financial measures not presented in accordance with U.S. GAAP or IFRS ("non-GAAP"), such as, without limitation, net gaming revenue and Adjusted EBITDA. These non-GAAP financial measures are not measures of financial performance in accordance with U.S. GAAP or IFRS and may exclude items that are significant in understanding and assessing Codere Online's financial results. Therefore, these measures should not be considered in isolation or as an alternative to revenue, net income, cash flows from operations or other measures of profitability, liquidity or performance under U.S. GAAP or IFRS. You should be aware that Codere Online's presentation of these measures may not be comparable to similarly-titled measures used by other companies. In addition, the audit of Codere Online's financial statements in accordance with PCAOB standards, may impact how Codere Online currently calculates its non-GAAP financial measures, and we cannot assure you that there would not be differences, and such differences could be material.

Codere Online believes that the use of these non-GAAP financial measures provides an additional tool for investors to use in evaluating ongoing operating results and trends in comparing Codere Online's financial measures with other similar companies, many of which present similar non-GAAP financial measures to investors. These non-GAAP financial measures are subject to inherent limitations as they reflect the exercise of judgments by management about which expense and income are excluded or included in determining these non-GAAP financial measures. Reconciliations of non-GAAP financial measures to their most directly comparable measure under IFRS are included herein.

This document may include certain projections of non-GAAP financial measures. Codere Online is unable to quantify certain amounts that would be required to be included in the most directly comparable U.S. GAAP or IFRS financial measures without unreasonable effort, due to the inherent difficulty and variability of accurately forecasting the occurrence and financial impact of the various adjusting items necessary for such comparable measures or such reconciliation that have not yet occurred, are out of our control, or cannot be reasonably predicted, ascertained or assessed, which could have a material impact on its future IFRS financial results. Consequently, no disclosure of estimated comparable U.S. GAAP or IFRS measures is included and no reconciliation of the forward-looking non-GAAP financial measures is included.
